

Features

For a moving experience like never before — shot free-style

Detaching the camera from the controller makes for a more advanced free-style camera. We significantly upped its potential with new picture quality, functions and ease of use. A lineup packed with options for a variety of activities. Spreading the fun of the outdoors all the more.

The pursuit of camera performance perfect for outdoor use

To raise its performance in outdoor scenes, we've increased overall camera performance significantly. With a new engine and lenses, and the high-speed and sensing technologies they've unleashed, we've produced a camera that's comfortable outdoors and shoots in high-resolution.

With enhanced interval shooting and camera-shake stabilization for shooting videos, it's more fun to shoot hands-free and while doing something else

Our high-speed and sensing technologies produce interval shooting with little blur, even when walking. Capable of shooting automatically at set intervals for photographs and movies that sizzle.

And the camera provides a high level of stabilization in 3-axis for shake that occurs when moved while shooting a movie.

[Highlight Movie] Automatically creates full-scale movie footage

Automatically creates a movie from the still or video footage you shoot. The camera automatically selects the best contents using our unique algorithms that incorporate editing techniques of professional movie creators. So you can look back on your memorable experiences via a digest in story format.

Packed with functions that increase the breadth of outdoors scenes you can shoot

Landscapes and people are a given, but you can also shoot morning, noon or night in high resolution — however difficult the conditions, such as backlighting or in the dark. You can capture various scenes clean and clear, without making difficult settings.

F2.8, 16mm*super wide-angle lens for shooting wide scenes

Its super wide-angle 16mm-lens shoots over a wide range with little distortion. With the magnificent outdoors as your backdrop, enjoy your selfies — alone or with friends — turning out just as you wanted.

*35mm film equivalent.

[EXILIM Auto Transfer] Auto send images to your smartphone at the press of a shutter button

You can “Auto Send” captured images to your smartphone simply by taking pictures as you usually do. Your images are sent directly to your smartphone, even when it’s tucked away in your bag.

*May not be possible depending on the communications environment or the smartphone model to be connected.

- * Requires installation of smartphone specific app “EXILIM Connect”.
- * Bluetooth® low energy compatible smartphone required.

EXILIM Connect User Guide

Toughness that takes on the hard conditions outdoors

Super strong materials and construction produce a toughness you can use in the rough outdoors. Packed with protections from the environment, tough against impacts, water, dust and the cold, so you can use it whatever the scene.
